SUMMARY

Computer Science graduate with experience in web development, data analysis, machine learning, and product development. Skilled in Python, SQL, and visualization tools (Tableau, Power BI). Delivered insights at BNI by analyzing export-import data and building dashboards. Passionate about applying AI and analytics to solve real-world business challenges.

SKILLS

Programming: Python, SQL, JavaScript, C++

Web Development: Full Stack (Next.js, React.js, MongoDB, Neon, Inngest, TailwindCSS, Express.js)

Data & AI: Machine Learning, Deep Learning (TensorFlow, Keras), Data Analysis, Data Visualization (Tableau, Power BI, Microsoft Excel)

Tools: Git, Docker, Figma, Microsoft Office

Soft Skills: Communication, Team Collaboration, Adaptability, Problem Solving

Languages: English (Intermediate), Korean (Basic), Mandarin (Basic), Indonesian (Expert)

WORK EXPERIENCE

PT. Bank Negara Indonesia (Persero) Tbk. – Data Analyst

Feb 2024 – Jun 2024

- Analyzed 38 provinces in Indonesia of export-import data, generating insights for market trend evaluation.
- Performed SWOT analysis for product evaluation and supported strategic marketing decisions.
- Built 5+ interactive dashboards in Tableau, Power BI, and Excel, improving reporting efficiency by 30%.
- Supported reporting for L/C and SKBDN, and analyzed bank guarantee data to assess market share.

Cashier - TO2SALON

Mar 2025 - Present

- Managed daily cash and non-cash transactions, preparing structured financial reports.
- Provided customer service, appointment recording, and product promotion.
- Maintained inventory and ensured cleanliness of salon product displays.

ORGANIZATIONAL EXPERIENCE

BEM FASILKOM Depkor Bekasi

Public Relation Coordinator

Feb 2023 – Feb 2024

- Developed strategic communication plans to engage students, lecturers, and academic community.
- Built partnerships with internal teams, media, and sponsors to support initiatives.
- Created sponsorship proposals, negotiated deals, and ensured partnership value delivery.
- Managed event planning, logistics, and social media campaigns.

EDUCATION

Universitas Esa Unggul
S1 Teknik Informatika – IPK: 3.96
S1 Informatics Engineering – GPA: 3.96

Agu 2021 – Feb 2025

RELATED COURSES

Machine Learning, Statistic, Artificial Intelligence, Data Warehouse, Web Programming, Computer Network, Software Quality Assurance

PROJECTS

- **Skin Disease Classification (Thesis):** Built CNN models (MobileNet, ResNet) achieving 90% accuracy; published in INFACCT Journal (<https://doi.org/10.61179/infact.v9i01.711>).
- **Commverz** – Full Stack E-commerce Website: Developed an e-commerce platform using Next.js, React.js, MongoDB, and TailwindCSS. Implemented user authentication, product management, and integrated payment workflows.
- **FluxiveAI** – AI-powered Web Application: Built an AI-based web app leveraging Next.js, React.js, Express.js, Neon, Inngest, and MongoDB. Developed real-time chat interface and integrated AI APIs for intelligent response generation.
- **Crabify** – Bangkit Capstone Project: Integrated ML to detect crab molting and led business asset development (pitch deck, market research).
- **iWarga Web Prototype:** Designed web prototype (Figma), system flowcharts, and ERD.
- **TO2Salon Prototype:** Built prototype (Figma), created flowcharts, and conducted UAT with Selenium IDE.
- **Network Topology:** Designed and configured using Cisco Packet Tracer with detailed documentation.
